

Challenged projects and programmes lead to significant business problems...

PM-PARTNERS PMO SURVEY *Statistics*

23% of organisations claim they conduct health checks on **all** projects in their portfolio

35% of organisations conduct health checks on less than a quarter of their projects.

20% of organisations do not conduct any health checks.

PM-Partners PMO Trends Report 2013

SOME *Benefits*

Project Health Checks are the most powerful measure available to business leaders and project managers to *ensure project success*

Identify cost and time savings

Quickly identify how to get a project, programme or PMO back on track

Capability gaps pinpointed, enabling targeted improvement

Early troubleshooting, risk management and improvement planning

Uncover key improvements that can be applied across all projects

Non-threatening with minimum disruption to your team

Increased stakeholder confidence and value

Review your business case, scope, resourcing and execution in alignment with your business strategy

Provide sponsors with a fast and accurate review of how their investment is performing

*“A Health Check pays for itself, as the **cost of fixing** a problem, always exceeds the cost of preventing it.*

Don't mark your own homework

Even organisations with project assurance in place, can still end up with significant project problems.

Ask us about the **\$3M** cost saving for a NZ bank from **1 Health Check**

ARE YOU GETTING *the results you need?*

It's not exactly a business secret that poorly-executed projects cost a great deal more than money (as if that's not bad enough). They can cost reputations. Careers. So why not face facts and get the help you need? PM-Partners is Australia's most highly-accredited project management specialist. So, to partner with PM-Partners is to put your project in safe hands. The safest. Which is probably why Australia's leading brands trust PM-Partners to run over \$1.7 billion of projects. Each and every year. Maybe you should too.
