

Find out why organisations trust us to manage over **\$1.7 BN** of projects each year.

Infrastructure Case Study

Enterprise – Technology Transformation Programme

PM-Partners group ensured successful delivery of the Strategic Initiatives and Technology Transformation Solution across three business critical Data Centres.

Key Business Initiatives;

- » Network Performance Improvement
- » Effective Capacity Utilisation and Scalability
- » End-to-End Data Protection
- » Risk Mitigation (Enhanced redundancy)
- » Enhanced End-User services and functionality

The Vendor and 3rd Party solution elements included; Security, UCS, MPLS Core and Edge Network, Routing and Switching, Load Balancing, Storage, Virtualisation, VMWare, OSS/NMS, Wireless LAN, Video Conferencing.

The Programme scaled up to a team of 50 (including 3rd Party Vendors). They were geographically dispersed and typically included the;

- » Programme Manager
- » Solution Architect
- » Project Managers
- » Programme Coordinators
- » Network Consulting Engineers
- » 3rd Party Vendors (Eight Vendors managed during the Program lifecycle)
- » Implementation Managers
- » Site Implementation Teams
- » Technology Development Engineers

CHALLENGE:

Programme had the potential to negatively impact millions of subscribers.

RESULT:

PM-Partners group ensured successful delivery of the Strategic Initiatives and Technology Transformation Solution across three business critical Data Centres.
