Overview

In today's fast-paced and changing economy, challenged projects almost invariably lead to significant business problems.

Accelerating and managing sustainable change through effective project delivery is the single most significant requirement of our business era. Organisations that understand and execute it effectively prosper. Those that don't, regularly compromise opportunity and often disappear altogether.

A direct result is an ever-increasing need for professionals to supplement traditional technical skills with high-value business delivery skills. To provide a significant contribution, project managers must be proficient across three critical domains:

- General business acumen
- Project management processes, techniques and tools
- Interpersonal and business communications skills

Our Project Management Professional Development Program combines both the 'art' and 'science' of project management; from the basic, underlying principles of project management, through to their application in the many challenging situations faced daily by project managers.

Our focus is on equipping participants with the disciplines, tools, templates and communication skills for immediate transfer to their workplace, and to effect immediate and discernible behavioural change in delivering business benefit through project initiatives.

Project Management Professional Development

Who should attend?

- Individuals entering the project management profession
- Project managers wishing to build on their skills and/or to revisit fundamental project management practices
- Project managers wishing to formalise their knowledge and gain industry-recognised certification
- Professionals transitioning careers

Prerequisites

To gain the most benefit from participation in this program, participants should be working in a project management environment or planning to do so within the near future.

Development Units

Participants who have been awarded the Project Management Professional (PMP)[®] credential by the Project Management Institute (PMI)[®] are eligible to earn **35 PDUs** for their participation in this program (30 Technical, 1 Strategic and Business Management, 4 Leadership).

Participants holding any of the Project Management accreditations (CPPP/CPPM/CPPD) are eligible to earn **20 CPDs** for each of these short courses.

Where to Next

Once you have gained industry experience in project management, you may wish to pursue a **nationally recognised experience-based qualification**.

PM-Partners have selected Opportune Professional Development (RTO ID:60072) as our preferred provider of Nationally Recognised Qualifications.

Please see the BSB41515 Certificate IV in Project Management Practice or BSB51415 Diploma of Project Management page of our website for more information*.

Alternatively, you may wish to consider furthering your skills with an Agile, PRINCE2[®] or programme management course.

Course Summary

This program is 5 days in duration and comprises the following modules:

Module 1: Project Management Fundamentals (2 days)

For project managers, team members and stakeholders

This module employs a 'from the ground up', end-to-end life cycle approach, introducing the fundamental principles, tools and techniques for managing projects from a project's inception through to closure.

Participants at this level may be absolute beginners, or individuals with low to moderate experience.

This course is a 'hands-on' and highly practical one which uses a real-life project case study, to which the participants will immediately apply their learning.

For more details on the content and structure of this course, please refer to the course outline for Project Management Fundamentals.

Module 2: Project Management in Practice (3 days)

Applying project management thinking to everyday project situations

This module uses a range of best practice principles to build upon participants' existing skills and knowledge (gained either through prior Project Fundamentals training or through their experience working in a project environment). It does this by way of a 'guided tour' through a series of rigorous and real-life scenarios, problems and issues faced by project managers across the board, as well as through the provision of tools, techniques and best practice methods for successfully managing these.

Project Management in Practice is led by an expert, senior-level trainer possessing a wealth of project management knowledge and long-term hands-on experience at both the project and program levels.

For more details on the content and structure of this course, please refer to the course outline for Project Management in Practice.

Course Delivery

Trainers of this course will use a case study delivery approach to provide participants with a 'hands-on', multi-faceted and challenging learning experience.

Participants will be actively engaged in progressing the project from conception to closure, and in building the necessary documentation and communications tools to do so.

Courses are facilitated by our expert team and can be conducted onsite or at our premises. All courses can be customised to suit your requirements.

Materials: A comprehensive participant handbook is provided for each module.

* Opportune Professional Development is the provider of these qualifications. PM-Partners is not a Registered Training Organisation.

PMBOK, PMI and Project Management Professional (PMP) are registered marks of the Project Management Institute, Inc.
