

# Business Analysis

Business strategy success depends upon developing and implementing solutions that **provide demonstrable value** to an organisation.

## OUR BUSINESS ANALYSIS FUNDAMENTALS Course!

Provides participants with the fundamental knowledge of processes and disciplines that enable delivery of objective requirements to address issues and opportunities.

Adding **maximum value** to your organisation.

## COURSE Objectives

- Understand the end-to-end business analysis process
- Provide you with tools, techniques and processes to help deliver solutions to satisfy stakeholder requirements and deliver benefits to the organisation.
- Provide you with tools and techniques for effectively influencing both individuals and stakeholder groups.

## COURSE Content

## LEARNING OUTCOMES

*Successful completion of this course will enable you to:*

- ✓ Understand the business analysis process,
- ✓ Establish the link between organisational / business strategy and proposed solutions,
- ✓ Plan for and manage successful change within your organisation including effective stakeholder identification, engagement, and management,
- ✓ Identify appropriate modelling techniques required to map current and desired state,
- ✓ Appreciate the role of effective requirements and their effect on a project throughout the project lifecycle,
- ✓ Understand tools, methods and communication techniques available for extracting and validating requirements, and
- ✓ Gain an overview of the *A Guide to the Business Analysis Body of Knowledge® (BABOK®)* knowledge areas required for the formal Business Analysis certifications.
