Overview

Kodak. Blockbuster. Nokia. Big businesses have failed to survive in a competitive and disruptive marketplace.

Increasing customer demand and expectation, the rise of disruptive competitors shaking up established industries, legacy processes that no longer fit in today's environment, a company culture that fails to support rapid go-to-market. These factors are all driving change and most organisations today know they need to transform if they want to survive.

AgileSHIFT, developed by global best practice providers AXELOS, helps prepare everyone across an organisation for transformational change. This offering provides staff with the knowledge and guidance to be able to understand, engage with and influence change by embracing agile and lean ways of working.

Taking a holistic view of an organisation, this easily tailorable, lightweight framework helps organisations on their change journey and to thrive in an ever emerging disruptive and competitive marketplace.
