Managing Successful Programmes (MSP®) - 5th edition

Foundation to Practitioner

Overview

Programme Management is a vital component in the delivery of strategic / business initiative and change. Delivering the right benefits and outcomes from change requires a structured framework to co-ordinate, communicate, align, manage and control the activities involved.

Programme Management provides this framework through organisation, processes, inputs, outputs and a focus on strategic thinking.

MSP 5th edition is an established best practice programme management framework, designed to align programmes and projects to organizational strategy and enable enterprise agility. MSP focuses on the delivery of outcomes of benefit, while mitigating risk and actively engaging stakeholders.

MSP consists of a set of principles, themes, and processes that provide a clear roadmap for the programme lifecycle, including larger, more strategic, complex, or multiple projects.

Key Topics

Participants will be provided with in-depth knowledge of:

- » The MSP principles, which are continuously applied to achieve value from programme management
- » The MSP themes, which provide the governance required to ensure the programme is aligned to the principles
- » The MSP processes, which enable you to manage a programme in an orderly, yet flexible and adaptable way

Comprehensive preparation for certification exams is also provided.

MSP Foundation

Objectives

The Foundation course introduces the MSP method and terminology to ensure participants understand the MSP guidance well enough to work in a team to deliver or manage a programme within an environment supporting MSP.

Participation will enable you to:

- » Improve your mastery of best practice programme management
- » Establish appropriate programme governance structures that effectively control the work involved, thereby ensuring the creation of value
- » Design programmes using incremental cycles that allow for multimodal delivery
- » Effectively engage stakeholders by providing a clear vision and full transparency around the achievement of programme objectives and expected benefits

Exam and Certification

The Foundation course includes the MSP Foundation online exam which consists of:

- » 60 multiple choice questions
- » 60% pass mark
- » 1 hour duration
- » Closed book

MSP Practitioner

Objectives

The Practitioner course prepares participants to take and pass the MSP Practitioner Exam.

The Practitioner exam is intended to assess whether the candidate can demonstrate sufficient ability to apply and tailor the MSP programme management.

A successful Practitioner candidate should, with suitable direction, be able to start applying the framework to a real programme but may not be sufficiently skilled to do this appropriately for all situations. Their individual programme management expertise, the complexity of the programme, and the support provided for the use of MSP in their work environment will all be factors that impact what the practitioner can achieve.

The course includes review, consolidation of concepts and exam questions for the Practitioner level certification. Please note that the Practitioner course is an exam preparation course and focuses on the application of MSP to prepare candidates for the Practitioner exam.

Why learn with PM-Partners?

Because we turn your career goals into reality.

Poor project skills are consistently quoted as a key reason for project failure. To be successful in project delivery, it's critical to invest in yourself and the capabilities of your team. This means setting clear goals and making a commitment to continuous improvement.

Certification and training is a vital part of this journey. But you need to know which foot to put forward, and when, to ensure you're heading in the right direction. That's where our expert guidance and support comes in.

Tell us where you want to go

At PM-Partners we start every conversation with the question, 'Where are you trying to go?' We then apply our expertise to show you exactly 'how' to get there.

We believe that having the relevant skills and methodologies is critical to delivery success, and ultimately career success. Depending on your aims, our team of professional development consultants will work closely with you to create a development pathway, or team training program, that aligns with your goals.

Helping to develop professional capabilities for 25 years
