

Cyber Security for Project Professionals

Overview

The cyber security landscape is constantly evolving, and businesses of all sizes are at risk of cyber attacks that can have serious financial, operational, and reputational consequences. To address this risk, it is critical that all functional roles within a business have a practical understanding of how to implement effective cyber security measures in their role, department, and organisation, thereby reducing the risk of cyber attacks and protecting sensitive information.

This course starts with a tour of the modern security environment to establish a foundational knowledge of threats and vulnerabilities. It then follows through to apply these learnings in the context of all cyber domains covering topics including risk management, security frameworks, roles

and responsibilities, security awareness and culture, supply chain security, business continuity, and more.

Participants will leave this course with the ability to identify cyber threats applicable to their function to make improved decisions across strategy, operations, policy, and processes for the protection of business assets. Participants will feel empowered to engage with technical professionals and understand the relevance of their objectives.

Ultimately, the goal of the course is to equip business professionals with the knowledge to strengthen people, process and technology defence lines, and to make informed choices to improve security.

Objectives

Course duration: 2 days

This course will enable participants to:

1. Recognise cyber threats and vulnerabilities:

Gain an understanding of the common types of cyber threats and vulnerabilities and how adversaries may use them to infiltrate people or systems for a malicious cyber attack.

2. Contribute to organisational cyber security:

Become familiar with risk-focused cyber controls, useful technologies, business continuity objectives, supply chain management, and other key topics to contribute to the organisation's security posture.

3. Implement Secure by Design principles:

Identify opportunities to embed security principles into early stages of your program, activities or function for a more secure outcome aligned to organisation security and risk management objectives, and customer trust.

4. Strengthen human-centric cyber security

defences: Learn how to support cyber security defences that place a greater emphasis on the role of people, amidst the constantly evolving threat environment.

5. Make informed strategic and operational

decisions: Learn how to make key strategic and operational decisions within your role, department, and/or organisation while considering cyber security risks and impacts.

6. Communicate effectively with technical security professionals:

Speak the same language as technical security professionals and feel empowered to contribute towards security objectives. Also, join the global cyber security community, stay up-to-date with security news, and follow key changes to legal and regulatory requirements applicable to cyber security.

Key topics

- » Cyber security objectives and challenges
- » Policies, regulations, and frameworks
- » Roles and responsibilities
- » Threats, vulnerabilities, and the attack surface
- » Impact of cyber incidents
- » Physical security
- » Data breaches and privacy
- » Cyber risk management
- » Supply chain security
- » Cyber security controls
- » Security by Design
- » Cyber security current and emerging technologies
- » Business continuity and disaster recovery
- » Cyber security in industry

Course delivery

As part of PM-Partners' new integrated learning solution, this course offers you the option to attend our bespoke classroom in person or virtually by dialling in from a remote location. Trainers are skilled at both delivery methods and use the latest in virtual technology to simultaneously provide participants with the same interactive, multi-faceted and challenging learning experience. Whichever delivery mode you choose, comprehension and recall techniques will be used to provide you with a solid understanding of Cyber Security fundamentals.

For group bookings, courses can be customised to suit your requirements and conducted onsite at your premises, at our training centre, or virtually.

- » **Virtual training:** [Learn more about our virtual delivery.](#)
- » **Materials:** A comprehensive participant workbook is provided.
- » There are **no pre-requisites** for this course.

Exam & certification

This course includes the Cyber Security for Project Professionals exam which consists of:

- » 50 multiple choice questions
- » 60% pass mark
- » 60 minutes duration
- » Closed book

Weekday (in-class/virtual) courses

Exam taken on afternoon of day 2 of the course.

Weekend (virtual) courses

Online proctored exam taken after the course. On completion of the virtual training, you will receive an invitation to book your exam. You have 6 months to sit the exam online. Please check availability when making your booking.

APMG International administers the Cyber Security for Project Professionals exam scheme.

Who is this course for?

In today's digital age, all business job roles can benefit from understanding core cyber security concepts and their application within policies, processes, and operations of all business functions.

The below roles are particularly crucial to an organisation's overall cyber security posture:

- » Project Managers
- » Business Managers
- » Change Managers
- » Executives
- » Finance, HR, Legal and Operational Managers
- » Risk and Compliance professionals

PDUs & CPDs

Professional Development Units. Participants who have been awarded the Project Management Professional (PMP)[®] credential by the Project Management Institute (PMI)[®] **are eligible to earn 14 PDUs** for their participation in this course (4 Ways of Working, 10 Business Acumen).

Participants holding any of the Project Management accreditations (CPPP/ CPPM/ CPPD) **are eligible to earn 20 CPDs** for this short course.

On completion of this course, you will be awarded with a **PM-Partners digital badge**. These are widely accepted by leading organisations as recognition of specialist training and often shared on social media.

On the last day of training, **you will be provided with a Digital Credential via the Credly Acclaim platform**. This badge can be added directly to your LinkedIn profile and/or shared to your newsfeed, or other professional profile, to share your achievement with your network.

Why learn with PM-Partners?

Because we turn your career goals into reality.

Poor project skills are consistently quoted as a key reason for project failure. To be successful in project delivery, it's critical to invest in yourself and the capabilities of your team. This means setting clear goals and making a commitment to continuous improvement.

Certification and training is a vital part of this journey. But you need to know which foot to put forward, and when, to ensure you're heading in the right direction. That's where our expert guidance and support comes in.

Tell us where you want to go

At PM-Partners we start every conversation with the question, 'Where are you trying to go?' We then apply our expertise to show you exactly 'how' to get there.

We believe that having the relevant skills and methodologies is critical to delivery success, and ultimately career success. Depending on your aims, our team of professional development consultants will work closely with you to create a development pathway, or team training program, that aligns with your goals.

Helping to develop professional capabilities for 25 years

Our accredited programs provide certification and development across a range of globally recognised project management and delivery streams.

Each year, our expert facilitators train and certify more than 12,000 people throughout Australia, New Zealand and South-East Asia to best practice standards. All highly qualified practitioners in their field, they draw from real-life scenarios and their own experience to add real value for individuals, teams and organisations.

Our promise to you

PM-Partners is committed to providing industry leading education that is relevant, up-to-date and designed to meet your specific needs.

We offer qualifications in multiple disciplines, including key products in PeopleCert's best practice portfolio, such as ITIL®, PRINCE2® Project Management, PRINCE2® Agile Project Management, PRINCE2® Programme Management, Prince2® Portfolio Management, and P3O®; APMG's AgilePM®, AgileBA®, AgilePgM™, Lean Six Sigma, Managing Benefits and Change Management; as well as the Scaled Agile Framework® (SAFe®); and Business Analysis programs from The Australian Chapter of the International Institute of Business Analysis™ (IIBA®), to name a few.

To find out more about how we can help you or your organisation uplift their capability, contact the experts on 1300 70 13 14.
