

# SAFe® for Teams

Establishing team agility for  
Agile Release Trains

---

## Overview

---

Scaled Agile Framework® (SAFe®) empowers complex organisations to achieve the benefits of Lean-Agile software and systems development at scale. SAFe is the world’s leading framework for scaling agile across the enterprise. Used by hundreds of the world’s largest organizations, SAFe sustains and drives faster time-to-market, dramatic increases in productivity and quality, and improvement in employee engagement.

Build the skills needed to become a high-performing team member on an Agile Release Train (ART)—and learn how to collaborate effectively with other teams—by becoming a

SAFe® 6.0 Practitioner (SP). During this two-day course, attendees gain an in-depth understanding of the qualities of high-performing agile Teams, the ART and how it delivers value, and what they can do to effectively perform their role using Scrum, Kanban, and XP.

Attendees also learn how to write stories and break down features, plan and execute Iterations, and experience a PI Planning event. Finally, attendees learn about the Continuous Delivery Pipeline, the importance of a DevOps culture, how to effectively integrate with other teams on the ART, and what it takes to continuously improve.
